Developer breaks ground on new \$40 million project

★ ARISTO Development, a leading real estate development company, has broken ground on their \$40 million ONE Cable Beach new luxury boutique residences and state-of-the-art, curve construction design project. The 69-unit, master planned development has a 20-24-month timeframe for completion once construction begins. And it anticipates “employing and investing in 200 Bahamians with good work ethic, qualified sub-contractors and other professionals related to the field over the life of the project”. “We are grateful for the efforts and dedication of all who supported this project. And we look forward to being part of the Bahamian works and urban community

development for years to come,” said Bahamian developer and real estate expert, Jason Kinsale, Principal of ARISTO Development. “We are dedicated to enhancing the lives of Bahamian people through the production and success of our construction projects.” Kinsale has a distinguished track record in real estate, boasting more than 20 years’ experience in residential, commercial, and multi-family developments in addition to a variety of large-scale land transactions. He was the founder and developer of Hampton Ridge and Balmoral residency projects. Our photo shows Minister Of Works Philip “Brave” Davis at the Ministry of Works with ARISTO developer Jason Kinsale.
